SunLink Ships First “Made in Canada” PV Mounting Systems

San Rafael, Calif., June 02, 2010 -- SunLink Corporation, a leading provider of solar PV mounting solutions, today announced the first shipment from its new Ontario, Canada manufacturing facilities. The SunLink rooftop mounting system (RMS) meets all local content requirements of the Ontario Power Authority’s (OPA) under the progressive Green Energy and Green Economy Act.

“SunLink mounting solutions are especially well suited for the conditions of the Ontario rooftop solar market” said Christopher Tilley, CEO of SunLink. “SunLink has more experience than anyone in the industry in delivering reliable, lightweight, roof-friendly mounting solutions into challenging environments, including situations where there are high wind and snow loads, and buildings with limited roof load capacity. We look forward working with integrators and developers to accelerate the deployment of rooftop solar in Ontario.”

In addition to delivering its industry-leading roof mount solution, SunLink offers comprehensive engineering support services for its Canadian customers, including: project layout and design support; extensive wind, snow, seismic and structural analysis; and prepanelization services to speed onsite installation.

SunLink’s PV mounting solutions offer the lowest total installed cost in the industry. SunLink systems are available in multiple tilt angles and non-penetrating rooftop mounting options for a wide variety of solar panels, guaranteeing flexible system design and high performance. SunLink’s offsite prepanelization service reduces installed costs and maximizes labor efficiency on the roof.

About SunLink

SunLink Corporation provides scalable solar module mounting solutions that reduce costs and installation times and improve system performance. Leading integrators and installers have chosen SunLink’s commercial rooftop and ground-mounted systems on 100 MW of projects at 540 sites across North America. SunLink’s experienced engineering team provides comprehensive customer service for each installation. Our fully customizable racking systems support modules from nearly every manufacturer.
